

GDX GRAPHIC DISPLAYS

NEXT GENERATION DISPLAY TECHNOLOGY

Modular hardware, a wide range of interfaces, and predefined toolchains enable fast development of customized display solutions. Fast, efficient, and tailored to your needs.

INNOVATIVE DISPLAY SOLUTIONS FOR DEMANDING APPLICATIONS

The GDx series comprises three base models that stand out with numerous features:

- Built to endure extreme conditions
 IP65 protection class and an operating temperature range from -30°C to +70°C
- High-performance processor & large memory

Yocto 4-based Linux OS, i.MX8 quad-core, 2 GB RAM, and up to 64 GB eMMC flash memory for optimal performance.

Optimal readability

Anti-glare cover lens, 85° viewing angle, high brightness (1000 cd/m²), and optical bonding ensure excellent readability – even in direct sunlight.

- Certified quality Certified sunlight resistance (DIN 75220)
- Precise control
 PCAP touch operable even with moisture and gloves.
- Clear sound
 1.5 W speaker for clear audio output.
- Flexible screen orientation
 16:10 format usable in landscape or portrait mode.

THREE VARIANTS, COUNTLESS POSSIBILITIES

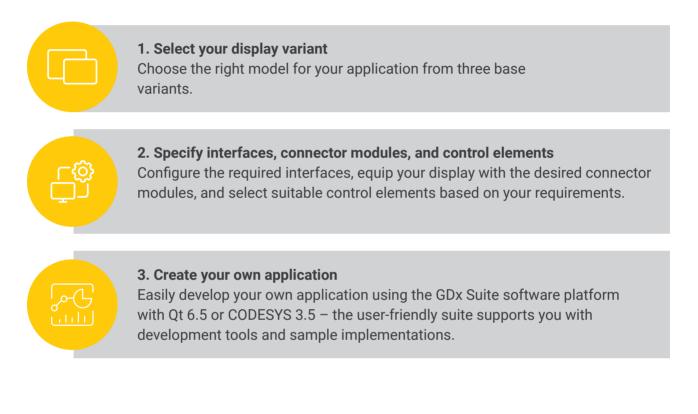

GDT-100 Graphic Display Touch 10 inch, 1280 x 800 pixels **GDT-070** Graphic Display Touch 7 inch, 800 x 480 <u>pixels</u>

GDH-070 Graphic Display Hybrid 7 inch, 800 x 480 pixels, customised front foil

TAILOR-MADE SOLUTIONS For every requirement

With the versatile, modular displays in the GDx series, you can customize the optimum solution for your machines - even in small quantities!

KEY BENEFITS AT A GLANCE

- **Versatile:** Whether mounted inside or outside the displays in the GDx series can be used flexibly.
- Customizable: From interfaces and connectors to controls and software
 all components are fully configurable.
- **Scalable:** A well-thought-out hardware and software platform allows easy development of a customized application that can run on all display variants.
- **Future-proof:** Thanks to the modular design and diverse interfaces, displays can be easily adapted or expanded to meet new requirements at any time.
- **Sustainable:** Screwed housings facilitate maintenance and repair in compliance with EU regulations (Directive (EU) 2024/1799).

TAILORED To your needs

MAXIMUM INTERFACE VARIETY

The GDx series offers a wide range of interfaces to ensure seamless integration and efficient data communication.

You decide which interfaces are used:

- » CAN: Three interfaces for reliable communication (CAN-FD capable)
- » UART: Two RS232 interfaces
- » Ethernet: Two high-speed ports (usable in parallel), ideal for integrating digital cameras
 - Standard Ethernet: One port for fast data communication (1 Gbit or 100 Mbit)
 - **SPE:** Special 2-wire Ethernet port (optimized for machine networking in harsh environments)
- > USB: One USB 2.0 high-speed port, e.g. for updating applications or downloading process data to a USB stick.
- » Digital inputs: Two digital inputs (0V/24V)
- Analog camera inputs: Four inputs for standard PAL/NTSC analog cameras all four can be displayed simultaneously

FLEXIBLE CABLING FOR PERFECT INTEGRATION

The GDx series also remains flexible when it comes to cabling. You determine the connector: **the type, position and cable outlet** (e.g. downwards or to the rear) can be customized - for a display solution that integrates seamlessly into your machine.

CUSTOMIZE YOUR CONTROL ELEMENTS

In addition to connector modules, control elements such as keypads, rotary and push-button and emergency stop switches can be configured and positioned individually. This ensures intuitive operation and increased safety through quick response options.

- Emergency stop switch
- Rotary- and push encoders
- Keypad
- LED indicators
- Custom mounting brackets

Can't find a suitable add-on module with your desired connector or have an idea for your own module? Get in touch – we're flexible when it comes to custom solutions

EXTRA FLEXIBILITY WITH THE GDH

The GDH model offers special customization options - the front foil can be designed entirely according to your specifications. From color and button layout to status LEDs – everything is configurable.

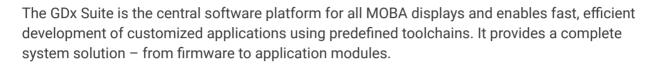

Thanks to its modular design, the hybrid model can also be used as an integratable display module – ideal for smooth integration into dashboards or control panels.

Tell us what you need - and design your customized solution with us!

Customised front foil according to your wishes.

Based on a Linux operating system, GDx Suite allows for independent development, free from proprietary systems or programming languages.

EFFICIENT DEVELOPMENT WITH PRECONFIGURED TOOLCHAINS

Preconfigured toolchains with powerful tools for graphics, control and fieldbus integration enable efficient application development.

Two main development approaches are supported.

You can choose between:

- Qt-based system development
- CODESYS-supported PLC programming according to IEC 61131-3

GDX CONTROL: EVERYTHING AT A GLANCE

To support application development, predefined software interfaces are available in the form of GDxControl libraries and GDx-Control-Live / GDx-Control-Console.

These allow you to configure special device functions and abstract complex operations through a unified interface – across all GDx variants.

FLEXIBLE EXPANSION, CUSTOMIZED APPLICATIONS

Independent application modules allow for flexible feature expansions at any time. We support you with our experience and expertise

Camera integration Visualization and control of multiple camera streams

Web browser Chromium-based HTML5 browser for connected applications

Modem integration Enables cloud access, Wi-Fi, and wireless communication

Object recognition Al-powered computer vision solutions

QR code generator Generate QR codes for diverse use cases

MOBA Internet Platform (MIP) Interface to MIP for remote maintenance and fleet management

MOBA GROUP

The MOBA Group has been an established name in mobile automation for more than 50 years. Our know-how and many years of experience in automation technology distinguish us as globally recognized experts. We develop and produce innovative machine control systems, identification and mobile weighing technologies as well as flexible software solutions. But MOBA components and systems are also used in other areas where robust and reliable sensors, controllers and operating units are required.

First Choice In Mobile Automation - that's what MOBA has stood for for more than 50 years!
