

MOBA Smart Positioning Controller

MSPC-1000

The MSPC is an advanced positioning controller designed for integration into OEM products. With its dual RTK GNSS technology, it offers precise positioning, ideal for demanding applications such as agriculture, measurement or autonomous vehicles. Its customisability and small size make it a versatile and efficient component of your system.

- » **OEM integration**
- » **Dual RTK GNSS**
- » **8 GB project memory**
- » **Web interface**
- » **Flexibly configurable for specific customer needs**
- » **Compact size**

Benefits

Accurate positioning

Improves the efficiency and accuracy of your applications

High customisability

Enables seamless integration into your systems

Simple remote control

Operation and maintenance in a user-friendly web interface
